	phone number for the driv			

Hospital staff was able to stabilize the driver but still listed in critical condition.

The metal object, possibly a leaf spring, appeared that it had some wear on it but officers are unsure if the object came from the bed of a vehicle of actually dislodged and fell off the vehicle. With the direction of the object showing to come through the center of the windshield and striking the driver in the driver's seat it appears that the object came from the lanes to the right of Unit 1 which would indicate that it came from a vehicle also going W/B. However there were no witnesses who could verify the evidence at the scene. WITNESS NAMES:

HOGAN, BARRY (940) 368-5451
